

DO NOT RAISE THE RATES FOR PREPAID CALLING CARDS, PLEASE!!!! A significant number of our service men and women use the prepaid calling cards to contact their loved ones. Raising rates will result in a 20% increase in their cost and place an undue burden on these patriots who attempt to remain in contact with their family, friends and loved ones while stationed across the country or abroad. Data shows that 95% of military personnel use prepaid cards. These cards are a life-line and their extremely low calling rates should remain intact, particularly for service men and women in Operations Enduring Freedom/Iraqi Freedom.
